

Downtown Burlington Parking Improvements

Thank you for your support of the Downtown Parking Improvement Initiative. As you may know, the Downtown Parking Team (see list of members below) had planned to launch a series of parking changes including new technology and revised rates early in October 2014.

Due to a delay in availability of some of the new technology, **we are delaying all changes to the public parking system until November 1st**. This will give us time to ensure installation of new technology. We will also use this time for additional outreach and education to inform the community about the Fall changes to the parking system.

Over the next few weeks we will distribute information about the new system through a variety of public information channels. As we get close to the November 1st launch, you may see us throughout the downtown spreading the word.

Here is a list of the changes to the public parking system that will be in place as of November 1st.
